MINISTRY OF HEALTH (MOH) ICT PLAN AND FY16 PROCUREMENT

Overview

Ministry of Health (MOH) shared about Healthcare 2020, the healthcare finance and infrastructure programmes launched between 2012 and 2015, and the IT projects planned for 2016 and beyond. He also touched on the key features of the Integrated Disease Outbreak Management System.

The key MOH procurement items for FY16 are:

Project	Description	Estimated Procurement Value *
Data Analytics	Support MOH's information needs and data analytics needs	> $1M
Integrated Disease Outbreak Management System	Revamp existing disease outbreak systems with the purpose of developing an integrated system on a C3 platform to increase its capabilities to meet new operational demands, streamline end-to-end operations, and tap on latest technologies for improved monitoring and faster response	> $5M
MOH Healthcare Claims Portal	Reduce clinics' overheads by consolidating multiple claim forms into an integrated claim form and computation	> $5M
MOH Digital Transformation	Transform MOH's digital services on information content & e-services, to provide better experience for citizens	> $1M
MediNet2 Data Centre	Set up a new MediNet 2 Data Centre for MOH	> $50M
Consolidated FM Services	Provide facilities management services for MOH and her statutory boards	> $5M

* The EPV provided are for multiple years over the lifespan of the project.
